### **GERMAN TANKS SECOND BEST TO BRITISH CRAFT**

First Pitched Battle Between Monsters Showed English More Powerful.

London, May 16.—German tanks which made their first appearance on the western front during the recent German offensive, came off second best in their encounters with the more powerful and better managed British tanks. Full accounts have just reached the British general staff of the first pitched battle between German and British tanks in which a squadron of six German land ships was routed by the British on April 24, near Villers-Bretonneux. Six German tanks appeared in front of the British line and started to roll up the fianks of the British infantry positions. A call for help was sent to the nearest British tank camp and a squadron, including both "male" and "female" tanks shortly appeared on the scene. A rough and tumble combat ensued.

The British also brought up seven of the new fast cruiser type called "Whippet tanks," which attacked the enemy's infantry positions on a ridge, rolling up the German line from the north. It developed that this ridge was held by a line of machine gun posts, while beyond the crest a large German attack. The Whippets ran from shell

force was massing in the open for an attack. The Whippets ran from shell hole to shell hole, inflicting terrible casualties and completely disorganizing the enemy's preparations for at-tack. These seven tanks, each with a full crew of twenty men, inflicted more than 400 casualties on the enemy in this engagement, while the casualties on board the tanks were only five men.

menting on this engagement to the Associated Press, said:
"The British tank has justified itself. The Germans have adopted them, but there is yet no evidence that they have any large number available. With the start which we have in tank construc-tion we should be able to preserve our superiority without difficulty."

It is of interest to note in this connection that George Hackenschmit, the Russian lion, and once champion wrestler of the world, developed out of an invalided boy.

It will be remembered that McCallie was tried under a special act passed some years ago by the legislature and later an ordinance drawn covering the act, which was passed for the benefit of the mountain and its residents. The act provided that before a person should become a guide on Lookout mountain that he first stand examination, be accepted, pay a privilege tax, and if he violated any of the laws of the mountain he was to be brought before the mayor of the mountain town,
